AUTHOR INDEX TO VOLUME 23, 1950

AKAMATU, H., and NAKAGAKI, M. On the linear boundary energy in two dimensional system 232

ANDO, T. See ISHII, S., 172.

ARAI, T. See GOTO, K., 17.

FUJINAGA, T. See ISHIBASHI, M., 25, 27, 229, 261.

FUJIWARA, S. The absorption of nitrogen by zirconium and iron 20

GOTO, K., ARAI, T., and KONO, T. On the reduction of 1-bromo-sinomeneine 17

HANYA, T. Étude des matières en suspension dans l'eau naturelle. I. La construction d'un turbidimètre portatif et la correlation entre la turbidité et la quantité des matières en suspension dans l'eau 216

HARA, R. Étude sur la précipitation de la protéine par les sels complexes métalliques. II. Précipitation de la protéine par les sels complexes du chrome, du fer, de l'argent, et du platine 7

HASÉGAWA, K. See MIYAKAWA, S., ... 260

HIRATA, M. Studies on the ammoniacal copper solutions. I. The reaction order of the reduction by carbon monoxide and a correction for the escaping carbon monoxide 32

HIRATA, Y., and NAKANISHI, K. The synthesis of 3-hydroxykynurenine (+chromogen) 134

HIRATA, Y., NAKANISHI, K., and KIKKAWA, H. New pterins (xanthopterin-B, leucopterin-B and a 6-dehydroxyleucopterin derivative) obtained from *Bombyx mori* (silk worm) ... 76

HIROKAWA, S. The crystal structure of adipic acid 91

HIROTA, K. On the anomalous thermal diffusion observed in mixed electrolyte solution 107

HOSHINO, S., and NAGASAKI, S. On the phase transition of pentaerythritol 80

HOTTA, H. See ISEMURA, T., 193.

IKEDA, T., and OZAKI, T. On the properties of water surface in contact with various vapors 43

INABA, A. Wettability of solid surface. IV. Wettability of palmitic acid surface towards aqueous salt solutions 146

INOUYE, K. On the structure of humic acids. An x-ray diffraction study 132

INUKAI, T. See SHIMAMURA, O., 205.

ISEMURA, T., and HOTTA, H. Studies on the gas liquid interface by surface potential measurements. II. On the solutions of dicarboxylic acids 193

ISHIBASHI, M., and FUJINAGA, T. Analytical chemistry by means of organic compounds. XIV. Electrolytic reduction of organic reagents at the dropping mercury cathode and its application to amperometric titrations. —8-hydroxyquinoline. (1) 25

Aanalytical chemistry by means of organic compounds. XV. Electrolytic reduction of organic reagents at the dropping mercury cathode and its application to amperometric titrations. —8-hydroxyquinoline. (2) 27

Chemical analysis by means of organic compounds. XVI. Amperometric titrations. III. Cuprimetric titrations 229

New differential polarography with one dropping electrode. The use of rotating current alternator 261

ISHII, S., and ANDO, T. Effects of hydrochloric acid on the paper chromotography of amino acids 172

ISHIMORI, T. Chromium content of volcanic rocks 75

KAMBARA, T., SUZUKI, M., and TACHI, I. Researches on the polarographic diffusion current. I. Criticism of the Ilkovič theory and theoretical revision of the Ilkovič equation 219

KAMBARA, T., and TACHI, I. Researches on the polarographic diffusion current. II. Distribution of the depolarizer in the vicinity of dropping mercury electrode and some experimental verifications of the revised equation 225

KANAZASHI, M. See SHIMAMURA, O., 205.

KANDA, Y. On the structure of fibrous proteins. I. A new polypeptide structure of α-keratin 137

On the structure of fibrous proteins. II. New polypeptide structures of β- and feather keratins, and three silk fibroins of *Bombyx mori*, *Saturnia pyri* and *Antheraea mylitta* ... 142

KANEKO, T. See SATAKE, K., 49.

KATSURAI, T. On some applications of Nakamura-Kuroda theory of the sedimentation of colloid in a vessel having inclined walls 189

KIGOSHI, K. On the viscosily of the uranium hexafluoride 67

Fusion and state equation of simple liquids. I. Derivation of the expressions for state equation and free energy 236

Fusion and state equation of simple liquids. II. Critical data and fusion parameters 240

KIKKAWA, H. See HIRATA, Y., 76.

KOIZUMI, E. A study on the solubility of sparingly soluble salt. VIII. Solubility of lead sulfate in various mixed solvents with isodielectric constants 124

KOJIMA, M. See YOSHINO, Y., 46.

KOMATSU, T. See TANAKA, Y., 14.

KONO, T. See GOTO, K., 17.

KUBO, S., and TSUTSUMI, C. Application of cation exchange resin to the determination of phosphorus in foods 187

KWAN, T. On the adsorption of carbon monoxide on platinum catalyst 70
Rate of hydrogen adsorption on reduced copper 73
MATSUI, M. Rearrangement of *cis*-caronic acid to *trans*-caronic acid 88
MESITUKA, G. The increase of the mean molecular weight of polystyrene under the influence of the electrostatic field 214
See TITANI, T., 213.
MIYAKAWA, S., HASÉGAWA, K., et UÉMURA, T. Le pléochroïsme de la molécule des matières colorantes dans l'alcool polyvinylique... 260
MIZUSHIMA, S., SHIMANOUCHI, T., and TSUBOI, M. Intramolecular rotation and the structure of high polymers. II. Further studies on the structure of polypeptide chain 176
MOMOTANI, M. See SEKI, S., 30.
MORI, Y., TANAKA, I., and SHIDA, S. Molecular orbital treatment of the ultraviolet spectra of cycloöctatetraene 168
MURAKAMI, Y. The occurrence of thallium in minerals in Japan 1
Modified colorimetric determination of copper with sodium diethyldithiocarbamate in the presence of hydroxylamine 3
New colorimetric determination of copper in biological matters..... 99
Determination of zinc and lead by means of sodium diethyldithiocarbamate 150
An improved method of the colorimetric determination of vanadium in the presence of a relatively large amount of iron..... 153
An improved method of the colorimetric determination of chromium with diphenylcarbazide 157
MURATA, K. On the specificity of aneurinase 37
NAGASAKI, S. See HOSHINO, S., 80.
NAKAGAKI, M. Studies on foams. IV. The effect of electrolyte on the foam formation of congo red solution 47
Studies on foams. V. The effect of electrolytes on triphenyl methane dye solution 102
The diffusion of dye solutions 104
Studies on foams. VI. Theory of foam formation..... 127
See AKAMATSU. H., 232.
NAKANISHI, K. See HIRATA, Y., 76, 134.
NAKANISHI, M. Fluorometric microdetermination of uranium. I. Fluorescent material for the determination 61
Fluorometric microdetermination of uranium. II. Extraction of uranium 198
Fluorometric microdetermination of uranium. III Isolation of uranium and preparation of the fluorescent material 201
NODA, T. Synthetic mica research 40
OBATA, Y. See YAMANISHI, T., 125.
ÔKI, M. See URUSHIBARA, Y., 35.
